

Gameday July 9th 2006

The three musketeers have nothing on the three pesapallo brave hearts of Susanna, Ian and Gavin. Does not matter the weather much just give us our Sunday pesapallo and we will be there.

With winter is hard to attract players to come to play but we three are having the time of our lives out in the fresh air and muddy fields.

Down at Lloyd Elsmore Park where the Pesapallo playing field has been marked out there is this cricket playing surface made with astro grass. Well when the weather has created a swamp on the field we go to the astro grass which is right alongside our field and we use it as our batting training area. Feet keep dry and we don't mess up the parks playing surface. Just with the three of us we get plenty of hitting done and when we take our turn in the field we get plenty of exercise and skill building by fielding hit pesapallo balls. Rain storms were all around us down there and it was cold until we hit and we got our share of fresh air and everyone else's share of exercise.

The winter season is quickly slipping away. Only another 4 games I think until this season is done. It would be just so good to get more coming to the games.

Next game is July 23 2006 it would be good to have you at the game
In November we have been invited to take part in the **Counties Manuka push** play day being held in Howick. This will be a great time to promote pesapallo and to promote the Society and Finland.

Anyone wanting to help us with these events should let Susanna know as soon as possible so that planning can get underway. Flags or any other promotional material anyone could lend us would be so much appreciated.
